

Viper Wire Rope Lubricator

Recovery Vehicle Similar to that used by the Australian Army

Viper Lubricating a Mooring Rope

Conventionally, wire ropes are lubricated manually, a method that can be both ineffective and hazardous. Viper WRL is a **sole sovereign manufacturer** of automated wire rope lubrication systems. These systems offer a safe, efficient, and rapid means of cleaning and re-lubricating wire ropes. Increasing assets and rope life by **up to 300%** and reducing manual labour for re-lubrication by **up to 90%**.

Capabilities:

- **Automated application, enhancing workplace safety** by reducing manual labour.
- Stringent **Quality Assurance and Quality Control** protocols.
- Eco Rope Lubricant is **certified as an Environmentally Acceptable Lubricant (EAL)** that meets the specifications as required by the EPA's Vessel General Permit (VGP) for use in applications on or near waterways.
- A **highly skilled national team of specialists offering on-site training** to ensure optimal performance.

Products & Services:

Viper WRL comes in three sizes, catering to wire rope diameters ranging from:

- 50mm-165mm (Maxi)
- 6mm-67mm (Mid) **NATO NSN 4730-66-166-9603** and
- 6mm-44mm (Mini) **NATO NSN 4930-66-166-8448**
- Range also includes: Seals, Scraper Plates and Cleaners.

Discriminators:

- **Currently deployed** by the Australian Defence Force, Royal Navy, and US Navy.
- Significantly **reduces lubricant waste, minimizing environmental impact.**
- We are a **global exporter** with a presence in over **80 countries**. Our products are supported by **40 distributors** worldwide, allowing us to provide **accessible support to the Australian Defence Force across the globe.**

Only Sovereign
Manufacturer of
Wire Rope
Lubricators!

Key Customers, Partners & Suppliers:

Australian Defence Force:
