

VIPER MANUAL ROPE CLEANER SYSTEM (VMRCS)

Revolutionising Rope Maintenance

Say goodbye to dirty, contaminated ropes with the Viper Manual Rope Cleaner System. Designed and engineered with precision and efficiency in mind, this innovative tool ensures your ropes are clean and fully operational, extending their lifespan and enhancing safety in any application.

Effortless Cleaning, Superior Results:

Wire ropes can suffer from wear, corrosion, broken wires or other forms of damage. Cleaning the rope ensures these defects are not hidden beneath layers of dirt making it easier to detect any damage.

With the VMRCS, cleaning ropes is no longer a laborious task. Its new ergonomic design and intuitive operation makes rope maintenance an easy process. Simply attach the VMRCS to your rope, tighten and it will do the rest. Effortless clean ropes every time.

Versatile & Reliable:

The VMRCS is a tried and trusted companion in the fight against corrosion. Its robust single unit construction and versatile functionality ensures it can tackle even the toughest cleaning jobs with ease. Suitable for ropes 8mm to 50mm. This collar provides a unique cleaning solution for both standard VRC and our Smooth Bore Cleaner.

VIPER MANUAL ROPE CLEANER SOLUTION KIT INCLUSIONS

- VMRCS – CUSTOM COLLAR
- 2 X D SHACKLES
- 2 X TIE DOWN STRAPS

APPLICATIONS

- WHARF CRANES
- SHIP CRANES
- ROV CABLES
- MINE WINDERS MOBILE CRANES ANCHOR ROPES
- DECK WINCHES OVERHEAD CRANES SHIP LOADERS

WHY CHOOSE THE VMRCS?

- ✓ **Superior Cleaning:** Removes dirt, grime, and contaminants. Providing a clean environment for lubricant penetration.
- ✓ **Extended Lifespan:** Regular cleaning extends the life of your wire rope assets saving you time and money.
- ✓ **Enhanced Safety:** Clean ropes means safer operations, reducing the risk of accidents.
- ✓ **Easy to Use:** Intuitive design requires minimal effort, making rope maintenance accessible to everyone.
- ✓ **Sheaves & Winch Drums:** Reduces wear.
- ✓ **Support Bushes:** Two high density polyguide bushes are spaced well apart giving the unit stability and keeping the rope centered as it moves through the VMRCS.
